

## ECO.flow

„Save gas! ...the ECONomic way!“

- ▶ multistage gas pressure regulator
- ▶ up to 50% less gas consumption
- ▶ guarantees a steady gas flow
- ▶ allows a high-quality welding seam

DRV-120

DINSE – always one step ahead.

ECO.flow is a high performance multi-stage regulator with built-in economizer and flow meter. It is mostly used for advanced gas shielded welding applications, where it will reduce the total welding cost by decreasing the gas consumption by up to 50%. In addition, reduced porosity sensitivity improves weld quality.

Technical Specifications:

|                           |                |
|---------------------------|----------------|
| Gas:                      | Argon-mix      |
| Connection inlet:         | CGA 580        |
| Connection outlet:        | 5/8-18" UNF RH |
| Maximum input pressure:   | 4000 psi       |
| Scale flow meter:         | 0 – 35 l/min   |
| Compliance with ISO 2503: | Yes            |
| Weight (kg):              | 1,85           |
