

DINSE G.m.b.H.

Tarpen 36, D - 22419 Hamburg

Dear Sir or Madam.

We are very pleased to respond to your request for information with regard to the directives 2011/65/EU, 2015/863/EU and 2017/2102/EU.

The DINSE G.m.b.H. always observes all national and international laws, as well as all valid directives, standards and regulations. We continuously keep track of all changes that concern, for example, the scope of validity, CE certification, or the expiration dates of exceptions.

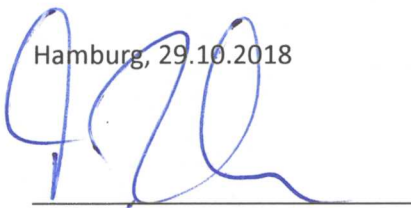

As an "economic operator" within the context of the directive, this term covers our role as manufacturer and distributor - we guarantee that our products, which have been declared RoHS-compliant, are designed and manufactured according to Art. 4 of the directive 2011/65/EU.

Against the background of delivery and product safety and in our own interest, we take our responsibilities very seriously.

The following procedure supports our compliance with the valid regulations and legal requirements:

1. Our suppliers have obligated themselves to comply with forbidden substances regulations and declaration duties as per RoHS. Transparency, intensive partnership-based cooperation and information exchange are the bases of our business relationships. This ensures that parts supplied to us fulfil our requirements.
2. Newly development products and DINSE products that fall under the scope of validity of the RoHS directive are generally RoHS-compliant.
3. Products that require CE certification are marked as such as of the required date. The corresponding formalities such as the conformity declaration are then available as of the due date.
4. Nevertheless, as a contribution to environmental protection and as a protective health measure, we have converted our production processes to comply with RoHS.

Hamburg, 29.10.2018

A handwritten signature in blue ink, consisting of a large, stylized 'T' followed by a series of loops and a long horizontal stroke at the end.
