„Take the lead with quality.“

- ▶ premium DINSE quality for your torch set
- ▶ effective dual circuit water cooling system
- ▶ high productivity
- ▶ robust construction
- ▶ consistent TCP

Dinse - welding without compromise.

DINSE offers proven premium products – our reputation for this is based on more than 50 years of experience in the manufacturing of welding tools. Now you can benefit from all advantages that DINSE quality welding torches offer using them on your welding equipment of the manufacturer Fronius. The newly developed torch heads can be installed easily and comfortably on the existing automatic torch set.

Perfect welding

With the latest generation of comfortable torch heads you can benefit from all advantages that DINSE products offer – and thus achieve a perfect weld result. The modular design allows extreme flexibility in all applications.

Easy retooling

For your existing welding equipment we deliver matching torch heads of highest technical perfection and material. The change can be done quickly. Just connect it to the host bundle and start welding - the TCP stays the same.

Enormous productivity

The dual circuit water cooling consequently draws large amounts of heat away allowing the torch set to be used at high welding currents and a long duty cycle - which assures an economic benefit.

Modular and durable

In terms of manufacturing quality and the few replaceable components of the torch head, a long and efficient usage is guaranteed. The various components can be individually replaced.

torch head:	CO ₂ :	mixed gas:	duty-cycle (DC):
DIX MFTZ 52xx	350 A	300 A	100%
DIX MFTZ 54xx	450 A	400 A	100%
DIX MFTZ 57xx	550 A	500 A	100%
DIX MFTZ 59xx	400 A	350 A	100%
