

The Company

## **DINSE G.m.b.H.**

**Tarpen 36, D - 22419 Hamburg**

hereby declares,

that the products we supply to you are products and as such cannot be classified as a substance or preparation (in accordance with Article 3 Definitions).

The (EC) 1907/2006 regulation ("REACH regulation") only applies to us as a downstream user. Obligations deriving from the production and placing on the market of substances or chemicals for pre-registration and/or registration do not apply to us.

Our products do not release substances. Article 7 of the regulation therefore does not apply to us.

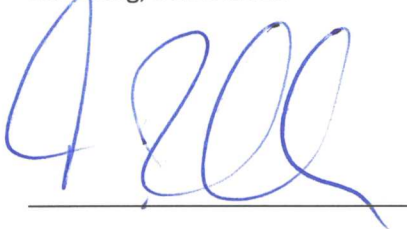

If any chemical constituents appear in parts supplied by our suppliers, they will where necessary be pre-registered by our suppliers. Precise statements regarding the final registration cannot be made with any degree of certainty at present.

To our knowledge, our products do not contain any substances that are listed as SVHCs in Appendix XIV of the REACH regulation.

As a downstream user, we meet all the demands placed on us by the REACH regulation and fulfil the information obligations stipulated in Article 33.

Any liability claims that may arise from failure to comply with the registration requirements of the REACH regulation exclusively affect our suppliers and will be passed on to them.
